

**FINAL RECORD OF DECISION
AVAILABLE FOR
SITES 3 AND 5 LANDFILLS**

Former Marine Corps Air Station El Toro

The 2008 Final Record of Decision for Installation Restoration Program Sites 3 and 5 documents the remedies selected for these landfills. The remedy for soil at Sites 3 and 5 landfills is capping which includes the following components: flexible membrane liner caps, erosion control, groundwater monitoring, landfill gas monitoring and collection, and land-use restrictions. Wastes will be consolidated at Site 3. Periodic reviews will be conducted to evaluate monitoring results to make sure that the remedy remains protective.

The selected remedy for groundwater at Sites 3 and 5 is no action. The no action remedy was also selected for soil at Site 3, Units 2 and 3. After the Site 3 capping remedy is constructed, consolidated areas will be recommended for unrestricted use.

The Final Record of Decision is available for public review at two locations:
