

**PUBLIC NOTICE
FORMER NAVAL AIR STATION MOFFETT FIELD, CA
BASE-WIDE FIVE YEAR REVIEW
INSTALLATION RESTORATION SITES 1, 22, 26, 28 AND 29**

April 2014

The Department of the Navy (Navy) is currently conducting the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) Five Year Review at the former Naval Air Station (NAS) Moffett Field. The former NAS Moffett Field is located 35 miles south of San Francisco and 10 miles north of San Jose. The Navy is conducting the Five Year Review in accordance with the requirements of CERCLA Section 121 (c). The purpose of the Five Year Review is to determine whether the remedies selected for implementation in the Record of Decision (ROD) documents at Sites 1, 22, 26, 28, and 29 are and remain protective of human health and the environment.

The following paragraphs summarize the selected cleanup remedies for each site evaluated in this review:

- Site 1 Landfill: Installation and maintenance of a landfill cover, monitoring of groundwater and landfill gas, and institutional controls (ICs), administrative measures designed to prevent exposure to contaminants.
- Site 22 Landfill: Installation of a landfill cover to prevent disturbing the contents, management of surface water runoff across the site, monitoring of groundwater and landfill gas, and ICs.
- Sites 26 and 28 Groundwater Plumes: Groundwater extraction and treatment, groundwater monitoring, and ICs.
- Site 29 Hangar 1: Implementation of land use controls to prevent damage to the durable epoxy coating used to encapsulate paint on the structural steel frame of Hangar 1. The ROD describing this remedy is scheduled to be completed during this Five Year Review cycle.

Groundwater, landfill gas, and landfill cap monitoring continue at Sites 1 and 22. Groundwater extraction, treatment, and monitoring continue at Site 28. To evaluate a more effective remedy, the Navy has discontinued groundwater extraction and treatment at Site 26, and completed a source-area characterization and treatability study in 2011. A Proposed Plan was completed and a ROD Amendment at Site 26 is in progress.

The Navy plans to issue a draft Five Year Review report of findings to United States Environmental Protection Agency, and California Regional Water Quality Control Board, San Francisco Bay Region for review; the final report will be issued in February 2015. The Navy will issue a public notice announcing the completion of the Five Year Review. Questions or comments on the preparation of this CERCLA Five Year Review or other Navy environmental activities at the former NAS Moffett Field may be directed to:
