

# Navy Monthly Progress Report

## Former Mare Island Naval Shipyard

October 30, 2014

Former Crew Member and Sargo (SS-583) at Mare Island, October 1957

## 1.0 INTRODUCTION

The Department of the Navy prepared this monthly progress report (MPR) to discuss environmental cleanup at the former Mare Island Naval Shipyard (Mare Island) in Vallejo, California. This MPR does not discuss cleanup work by the City of Vallejo (City) or its developer, Lennar Mare Island (LMI), through the Navy's Eastern Early Transfer Parcel (EETP) Environmental Services Cooperative Agreement (ESCA). The work completed by the City through LMI this month is reported separately. This MPR discusses progress made during the reporting period from September 26, 2014 through October 30, 2014. The information provided in this report includes updates to field work and removal actions, document submittals, the progress of regulatory reviews, issues associated with Navy environmental programs, and Base Realignment and Closure (BRAC) Cleanup Team (BCT) and Restoration Advisory Board (RAB) meetings.

## 2.0 FIELDWORK, REMOVAL, ACTIONS AND UPCOMING EVENTS

During the month of October 2014, the Navy conducted fieldwork at the Paint Waste Area (PWA) and at Building 742.

### Paint Waste Area (PWA):

The PWA Remedial Investigation (RI) fieldwork was completed on Friday, October 17, 2014 with the backfilling of the investigation trenches and disposal of the excavated soil not suitable for use as backfill. The next step will be to produce the RI Report.

### Building 742:

The Navy collected soil vapor and groundwater samples at Building 742 to monitor the subsurface conditions after the September subsurface injections. The injections were performed to treat the Navy-retained condition (NRC) impacts at the site. Additional monitoring of groundwater and soil vapor will be conducted at the site in the future.
