

Naval Station Treasure Island

Site 12 Radiological Investigation and Cleanup Process

The CERCLA Process

The cleanup of radiological contamination at the former Naval Station Treasure Island is conducted under the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) that provides regulations for effective environmental cleanups.

- Allows for oversight and guidance by regulatory agencies and partnerships with other stakeholders

The radiological investigation is overseen by the State of California. Oversight ensures the Navy's program meets state and federal laws and provides long-term protection of human health and the environment.

Non-Time Critical Removal Action

(Solid Waste Disposal Areas)

- Removal of chemical and radiological contamination in the SWDAs
- Results will support evaluation of remedial action alternatives in the Feasibility Study Addendum

ONGOING

Radiological Scoping Surveys

(Non-Solid Waste Disposal Areas of Site 12)

- Results will support evaluation of remedial action alternatives in the Feasibility Study Addendum

Remedial Investigation

- Characterizes site conditions
- Determines the nature of the waste
- Assesses risk to human health and the environment

Completed 2012

Feasibility Study (Chemical)

- Development, screening, and detailed evaluation of alternative remedial actions for chemical contamination

Completed 2014

Feasibility Study Addendum (Radiological)

- Evaluates alternative remedial actions for radiological contamination

2017

We encourage early and continuous community participation by keeping the community informed and involved.
